

SOURABH MHALIM

Senior Java Developer | Backend & Microservices Engineer

Pune, Maharashtra, India
Senior backend engineering profile

PROFILE

Senior Java developer with enterprise delivery experience across banking and product engineering. Specialized in Java 8-21, Spring Boot, microservices, REST/OpenAPI, automated testing, and cloud-native delivery. Experienced in technical leadership, API design, legacy modernization, CI/CD, security quality gates, and production releases.

CORE SKILLS

Languages & Frameworks	Java 8/11/17/21, Spring Boot 2/3, JUnit, Mockito, MapStruct, Lombok
Architecture & APIs	Microservices, REST, OpenAPI, Feign, Kafka, Redis, design documentation
Data & Cloud	PostgreSQL, MySQL, MongoDB, AWS S3/Lambda/ECS, Docker, Kubernetes, OpenShift
Delivery	Jenkins, Git, SonarQube, ELK, CI/CD, security scanning, mentoring, technical leadership

EXPERIENCE

Cognizant Senior Associate - Projects	Mar 2024 - Present
Lead backend delivery for enterprise banking microservices. Shape API contracts and solution design, guide offshore engineers, implement Spring Boot services, and own automated testing, security quality gates, OpenShift deployment, and release support.	
Atos Syntel Senior Software Engineer	Oct 2022 - Mar 2024
Built and supported Java and Spring services in large-scale delivery environments, with a focus on API reliability, maintainability, test automation, and dependable releases.	
Integrative Systems Software Engineer	Dec 2019 - Sep 2022
Developed backend applications and integrations using Java, relational databases, automated tests, and service-oriented patterns.	

SELECTED PROJECTS

KBC Business Dashboard - Banking modernization
Modernized mandate, standing-order, investment, insurance, and custody-account capabilities into Spring Boot microservices. Delivered 10+ APIs with 100% test coverage and zero critical vulnerabilities.
Java 17 / Spring Boot / OpenAPI / OpenShift
SmartRent - Tenant management and billing
Designed a platform for properties, tenants, meter readings, automated rent and electricity bills, invoices, reminders, payment workflows, and role-based portals.
Java 21 / Next.js / Supabase / Docker
Sakas Foods Inventory - ERP-lite operations
Planned end-to-end traceability from grain purchasing through grinding, packaging conversion, warehouse stock, sales, GST invoicing, barcodes, and manufacturing reports.
Spring Boot / PostgreSQL / Next.js

DELIVERY HIGHLIGHTS

10+	Production APIs delivered	100%	Test coverage on key deliveries	0	Critical vulnerabilities
